EXAMINER'S AMENDMENT

1. Claims 11-20 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected Species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 1/04/06.
2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Adrian Battison on March 01, 2006.

The application has been amended as follows:

Claims 11-20 has been cancelled to a non-elected Species.

3. The following is an examiner's statement of reasons for allowance: The prior art fails to disclose or render obvious the claimed combination including: a boom arrangement for use in a car wash comprising: a first and a second boom assembly each comprising: a mounting member, a flexible hose for receiving a wash-spray device on one end of the hose and a water supply device at the other end of the hose, a boom for supporting a substantially horizontal portion of the hose, a rotatable coupling carried on the mounting member for supporting an inner end of the boom so that the horizontal portion of the hose can rotate about a vertical axis in a generally horizontal plane with the remainder of the hose extending downwardly from the horizontal plane at an outer end of the boom; and a parking arrangement for moving the coupling, the boom and the

hose to a parked location at a specific angular location around the vertical axis, the boom assemblies being arranged to be mounted side by side on the support with the mounting members thereof adjacent but spaced on the support such that each boom as it rotates passes underneath the mounting member of the other boom, the parking arrangement of the boom assemblies being arranged such that in the specific angular location of the parking location of each boom assembly the boom thereof extends in a direction generally 180 degrees away from the other of the boom assemblies, and the boom of each boom assembly being inclined downwardly and outwardly from its rotatable coupling such that with one of the booms in its parked position, the other of the booms can rotate around its vertical axis while passing underneath the other boom.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following patents are cited to show the art with respect to a boom arrangement: Rohan, Livingston, and Wiebe.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dinh Q. Nguyen whose telephone number is 571-272-4907. The examiner can normally be reached on Monday-Thursday 6:00-4:30.
